Personalize with a custom ink

Looking to match a dress or table linen? Send us a swatch and we can order a custom Pantone ink color just for you! For \$50-\$65 you can add a custom color to truly personalize your suite.

Don't forget the back of the card

We are able to print on the backside of any card. We recommend using one ink color and our 236 lb. or duplexed stocks for the best results. Making this big impression only adds 50% to the cost of the card.

Add a custom backer card

Letterpress print or foil stamp a custom pattern on a backer card to add dimension and creative color pops to your suite.

Mix it up with colored papers

Why not add color to your suite by printing some, or all, of your pieces on colored paper? See the EMBELLISH section for our colored papers and new duplexing techniques. Along with the ink colors Copper, Gold, Silver and Black, our new opaque ink palette is ideal for printing on colored papers.

Mix up your ink palette

You don't have to print all of the colors in your palette on every piece. Rather than upgrading each piece to 2 or 3-color, why not break it up and print one color on each piece? Switching color on press is what we call a "Press Wash" and it only costs \$150.

Love the layered look of our designs?

We love to see type printed over graphics, but it works best when printing either a dark ink, or one of our opaque inks, over a lighter background color.

Make an impression with a Blind Hit

A graphic with no ink is a great way to add an elegant detail to your suite. When pricing out your suite be sure to count a Blind Hit as a "color." For example, printing a Blind Hit and Black ink on a card would be 2-color pricing.

In a hurry?

Standard rush charges are applicable for any orders that are letterpress printing only and do not include embellishments and upgrades. If you would like to rush an order with embellishments and/or upgrades please contact us to determine timing and feasibility.
